

# TRADING EDUCATION PROGRAM

*Presentation*

## ABOUT

This is a quick presentation of the Trading Education Program given by Daniele Prandelli. It is very important you read it before considering applying the Program; if some information is missing, do not hesitate to contact me.

# Trading Education Program

## *Presentation*

This is an introduction to the Trading Education Program. I like to call it this way because it will not be a book, or a course where you will be left on your own, or many PDF pages with rules and examples about the past and that's it. Nope. This is an ongoing course where I provide all the theory, the examples on how to apply my rules and studies, how it worked in the past linked to the calls I made through my Reports, and we will work together for one year to build the next trades and the next forecasts. The Program will be covered with PDF documents and videos. It will be mainly focused on the S&P500 Market, then we can use the same concepts in the NASDAQ, a wonderful market. I will provide the rules on how to use the same studies on markets like Soybeans, Corn, Cotton, Gold, and Live Cattle. I do not look at or study other markets even if you ask me. If you want to try to apply the teaching on other markets, that's up to you.

I deeply suggest you read with attention this entire document. Considering that the Trading Education Program is very expensive (for some of you may not be, but I do consider it very expensive), it would be better to spend 10 minutes to read below and be aware of what this Trading Education Program is about. I have a lot to say...

## What is the purpose of the Trading Education Program?

The Trading Education Program has the purpose of providing a whole trading knowledge, approach, and rules to achieve profits. I am confident that the purpose will be reached because I know what I am teaching. Precise rules, precise strategies. I share more than what I share through the Reports, of course. The student will learn first what a cycle is for real (in my opinion), how it affects the market. There are many approaches to cycles, but there is not a real, steady definition of it in trading and how to use it. The Program will show without any doubt what a cycle is, and how to apply it, how to search it in the market to be able to read the structure of the time in the future. That's how I am able to make some precise calls months in advance.

Once we understand how to read the time, we move to the price. Despite the time-factor analysis is the result of 100% of my own work and research, the Price Analysis will be covered through my own studies, but also studies of other people's work. There is no reason for me to take any credit for something that works that is not mine. Probably, I can only take credit for the fact that I have more than 20 years of experience in trading and research, and I can say

now what is worth studying and what is not, from my point of view. You can imagine how many books, courses, and research I had through all these years. I have spent not just money, but a lot of my personal time to understand what to rely on.

We will merge the price and time action to achieve the final target of having a whole system that leads to successful trading activity.

I will provide you with my own rules to govern yourself, which is a fundamental part of being a successful trader. If you do not trust what I am saying, you are far from being a good trader, in my opinion, and this may be your real problem. If you want to be a good trader, you must be mentally strong. This is the hardest part of being a good trader. You may be lucky enough to have this gift given by Mother Nature. Unfortunately, I was not, and I know what it means.

## How the Trading Education Program works.

The Trading Education Program is mainly divided into 3 modules:

**MODULE 1** - The Forecast: it covers all about creating the forecast models, the forecast of the trend, the forecast of precise Key Dates to work with, the structure of what a cycle is (to understand how it works and how to use it, because what people talk about cycles is completely wrong, in my opinion). The Module 1 covers:

- The King Road Map
- The Forecast Model + Excel File
- The Birthday Match
- The Cycle Time Pattern (CTP)
- How to – 2023 S&P500 Forecast and Calls
- Secondary timing tool
- I share my personal 2022 File notes written down in advance for the study of the CTP
- S&P500 Trading System

The next step will be:

- 2024 – We prepare the Annual Forecast
- Rules and files to prepare the PFS for the future
- Studying the next potential scenarios (during the year)

Module 1 is ready and available.

**MODULE 2** - The Price analysis: very important to develop an intelligent strategy, knowing where to look at potential resistances/supports (sometimes precise to forecast the High or the Low of the Months or the Week). How to plan, confirm, or trigger the trades and use tight stop-loss orders. The main Topics will be:

- Planetary Lines
- Parallel Lines
- Special Numbers on the Index
- Price action reading to find precise potential Highs or Lows from the Monthly to intraday time-frame (a quite big topic that includes several techniques)
- Make-or-break levels linked to the Time analysis (the Key Dates create Key Price Levels)

Module 2 will be released by January 15, 2024 (probably earlier, but this is the deadline in the worst case; however, studying the market in real time, we will see some price studies even before the release of Module 2).

**MODULE 3** – Whole Study in action: how to trade once we have the time and price analysis. We will see how to organize the work, the correct mental approach, and what to do if we have problems in being disciplined. I will also provide the CODE I use with the MultiCharts software to automatically execute orders (mostly when I cannot be in front of the monitors, but I still want to trade).

Module 3 will be released by January 31, 2024, but this Module will be essentially what we are going to do during the entire year.

At the end of Module 3, I plan to send to you a kind of book with binder rings.

I believe we are about to have a lot of fun because we will apply all these rules to study the market during the year. My will is to share the studies of my calls and strategies during the next year, and we will do it together.

If you are a subscriber (this course is mainly for those who subscribe my work and want to learn how I am able to make certain precise calls, even because I do not think there are many people knowing me outside my subscribers, except for the brave free emailing list subscribers), you have the chance to learn fully how I do create the forecasts. But there is much more in this Program. There are things that are impossible to share through a Report.

If you are wondering what kind of calls you may learn, I can mention some of the several correct and precise calls I made about the S&P500: in 2019, in January, I said to be ready for a strong uptrend, while most of the “gurus” were calling a new retest of the December 2018 Lows. Months in advance, I did forecast the March 2020 Low through my Forecast Model, just a few days off in calling the Low of the year (I am not saying I did forecast the price! I am saying that I did forecast the time of the Low). I said that from March 2020 Low, the market was about to start a strong and (for anyone) unexpected uptrend. About the recent times, I called the Low and buying opportunity on March 20-23, 2023. Not a precise Low, but a perfect buying opportunity. I said to follow the uptrend until June 16, the exact High of June 2023.

I will provide you with PDF documents for the theory and examples from the past. Based on the teachings, during the year I will send more documents, also using videos, to see how I am forecasting what's next, and how I am planning to trade. We will have direct communication to study the market together and plan the trades. If you are a subscriber, you know very well that I plan 90% of my trades in advance, and just rarely I change it, sending real-time Updates during the day.

I have several people that have already bought the Trading Education Program, and I have already shown to them a few precise and important Key Dates for the 2024; and now they know I am doing it.

## Why am I providing a Trading Education Program

I have several reasons for doing it. First, I have two little children. If you consider that I live in Italy, and I do work with the US Market, my daily trading session starts at 3:30 PM and it ends at 10:00 PM, Italian time. You understand that, if I want to spend time with my family, I cannot work full time on the US markets. It has been hard for me to work in the last months, trying to find the time to trade and the time to spend with my family. So, I think this is an opportunity to create an Education Channel, so I can share my experience and knowledge to those willing to learn how I trade, and at the same time, I can have incomes while I can spend some time with my family. I will keep providing the Daily and Weekly Reports, of course. I will also keep trading, of course, but I need to change the approach of my personal strategy, focusing only on important Key Dates and let the position run, even for weeks or months, without the need to touch the position. You will see me doing it, and you may like it too.

A secondary reason is that I have persons asking for a Course to me, since years. But I never had time to do it, I was always focusing and spending time on my studies and trading (following the market in intraday takes a lot of energy). I feel this is the time. I feel I am at the point that I can really help, and I have the right knowledge. I feel very excited about it, and I also need it because it brings fresh air and a new challenge to me.

It will be an amazing challenge for me to see you making a precise call about a High or a Low in advance and creating successful strategies; it will become my purpose! You will see the structure of the time, months in advance, and you will tell me the right date when the market can make a High, for example. I think we are going to have fun, and more.

## How long does it take to learn?

You probably do not need more than one week to read the PDF Documents. But reading something does not mean understanding something. It will take at least several weeks to understand the entire system, but then I think a normal person needs at least a few months to earn the experience of seeing things in the way I see them (or even better). No worries, I am up 100% to teach it all, and that's why we will study the market together for one year, sharing with you new documents and videos on how I am studying the market in real time. And you will also do the same studies, creating a kind of co-operation (if you want to, of course) in the trades I am about to take. I will always share my studies with you, then of course the learning curve is also something personal. What I want to say is that I am not teaching anything very complicated. You just need to give yourself time to digest the multitude of information. It is a normal learning process.

## Why is it so expensive?

You are learning how to build forecast models that will work forever. My Forecast, for example, told you to expect the Low of the year around March 18, 2020. It said to buy in March 2023. The teachings in the program will allow the student to see some time-window in advance where the market will make a Low, with the ability to see exactly what happens, why the market is about to repeat itself right in that moment. These are just a few of the several reasons this Program is so expensive. Unfortunately, I would not be able to write down a Course that is not valuable. Seriously, I am not smart enough. I can only teach and share what I know that works. I am not able to write down a book and sell it at 50 Euro. I do not know what I should write there. I have no funny stories to tell, and for 50 Euro I have nothing useful to say. There are already good books at 50 Euro, but they will not teach you entirely how to create reliable forecasts or how to trade precisely.

## Why is not more expensive if it really works?

The correct question is: what is supposed to work? I am not selling a robot; I am selling knowledge that can be used for the entire life of the Futures Markets. No one lazy can make money with the knowledge I am sharing in my Program. This is not a formula you put on Excel and then you make profits. You must study the market as I teach, but still, you have to do it. That's why I do not sell my program at 100K: my knowledge still needs you to make the whole system work.

## What do you need to be able to follow the Education Program?

- Software with real-time data covering the Futures Markets, any Futures Broker provides it.
- A software that can draw planetary lines and basic drawings (I use Timing Solution Primo Version, very cheap but great software, in my opinion – EOD data not included).
- End-of-Day daily data to use in the Software that draws planetary lines (if not included).
- Excel software.
- MultiCharts software if you are willing to use the CODE to auto-trade or robo-trade when you cannot follow the intraday market (this approach has obviously pros and cons to consider and be aware of).

## Important clarifications

I am not teaching a magic formula or a secret to use the Square of 9 to turn you into a millionaire. Sure, I teach rules to be able to statistically forecast the market most of the time correctly. I strongly believe that if you see how my analysis is created, you will be able to take advantage of it much more than using my Reports. I teach how to study, how to create analysis. It means that you have to apply what I teach to make it work. I do not teach how to be lazy and make profits. The doubt is always in the subjective interpretation of my teachings. Well, I present my work in a way that it is not possible to have a wide interpretation of my teachings. It is something that will be clear only after seeing my work.

I want to immediately explain that I do not use any complicated astro-related work, or some very esoteric stuff. If your expectation is to learn something that uses horoscopes with some secret aspects, my Education Program will let you down. But from my experience, what I teach is much more precise and reliable than any astrology related study. The purpose is to profit from trading, not to learn something complicated.

If you are looking for +10.000% profit in one year, this Program is not for you because I am not able to do it (look at the Robbins World Cup trading, it looks like no one can do it, unless you get a lucky trade during the big fall in 1987, but I may be wrong). When I see a +10.000% performance, I always doubt it, it is just my opinion, respect that. Here, we talk about consistency over years, as my Trades Record of the signals provided in advance through my Daily Reports proves since 2012. Sure, we have some tough moments, but how we handle it makes the difference on the big profits we will make in the future.

The knowledge you are about to get through the Education Program will last forever. I know some of you think that 5.000 Euro is a crazy price, but what you get is not what you find in a 100 Euro Course; we will work together for one year then. When I was 18 years old, I spent about 7.500 Euro for a Course that was horrible, by Mariano La Rosa. I know how it feels, and I will not be like him. I deeply want to teach, in a honest way. I am sharing what I have learnt in 20 years. But you must be prepared to believe in what you see, not in what you hear. Trading is very hard for anyone, even for the real best traders in the world. It requires high attention, discipline, acceptance of losses, patience, knowledge, time. No one multiplies money in trading without a huge effort. Conditions are always changing, and a discretionary approach can give high satisfactions, but you must understand the truth, or the truth will eat you.

I am sure that if I stay here to write this document, I go on writing 10 more pages. Sure, there would be a lot more to say. Please, if you have any questions about the Trading Education Program, do not hesitate to contact me.

In my teaching, I may have missed something, or I may have explained something without being clear. Well, you just make me notice it, and I will do my best to fix it. I mean, I want an open approach to each other. I cannot always be available 24h per day, but I will always reply to any questions; at worst, I ask you to wait at most a few days.

## Requirements: Cost, How to Pay, and Non-Disclosure Agreement

The price of the Trading Education Program is 5.000,00 Euro. However, for those who pay before December 31, 2023, the price will be 4.500,00 Euro. This discount is given only because I have a tax incentive until then... I let you take advantage of it :). It is not a marketing strategy.

### **We use the Bank Wire Transfer for the Payment, here the Bank details:**

Beneficiary: Daniele Prandelli

IBAN: IT2500301503200000005899398

Bank Address: Piazza Durante 11 - 20131 Milano

BIC:

- If from Europe, SEPA circuit: SWIFT – FEBIITM1XXX
- If outside Europe: SWIFT - FEBIITM2 (if 11 letters are required, please use FEBIITM2XXX)

If you prefer to pay in US Dollars, please contact me at [info@iaminwallstreet.com](mailto:info@iaminwallstreet.com)

We also require you to sign, scan, and send back to me a Non-Disclosure Agreement, with a scanned ID attached.

This is all. You know that you can always contact me for any further information.

Thank you for your attention.

December 26, 2023
